PROFESSIONAL SUMMARY

Data Engineer with over 5 years designing scalable data pipelines and platforms for healthcare and fintech. Specialist in transforming scattered sources into reliable, governed, high-performance analytical models. I combine product sense and engineering rigor to deliver data people actually use in their decisions.

WORK EXPERIENCE

Senior Data Engineer | HealthData Labs

2022 - Present | Madrid

Owner of the company's data platform and data governance model.

- Designed and operated ingestion pipelines that cut critical report latency from 24h to 15 minutes.
- Led the migration to a governed lakehouse, reducing storage costs by 38%.
- Implemented data quality controls that lowered erroneous-report incidents by 70%.

Data Engineer | Banco Nube

2020 - 2022 | Barcelona

- Built the credit-risk data model used daily by 12 analysts.
- Automated recurring ETL tasks, freeing ~10 team hours per week.

PROJECTS

Self-Service Data Platform | Tech Lead

2023

Internal portal where analysts query data without writing SQL.

- Adopted by 80+ users within the first 3 months.
- Reduced dependency on the data team by 45%.

EDUCATION

MSc in Data Science

2019 - 2020

Universidad Politécnica de Madrid — Madrid

TECHNICAL SKILLS

Data Engineering: Python, SQL, Spark, Airflow, dbt, Kafka

Platform & Cloud: AWS, Snowflake, Databricks, Docker, Terraform

Governance & Quality: Data Contracts, Data testing, Data catalog, Lineage

PUBLICATIONS

- Gomez, L., Ruiz, M.. *Data governance models for healthcare lakehouses*. National Data Conference (2024) — <example.com/pub/2024>

CERTIFICATIONS

- AWS Certified Data Analytics — Associate
- dbt Analytics Engineering
